Meghdoot Resort Management System (MRMS)

Information Systems Design (ISD) | Group 06 | May 2026

#	Name	Student ID	#	Name	Student ID
01	Prothoma Akter	202223104002	03	Forhadurzzaman	202223104022
02	Nadira Khanom	202223104003	04	Shafiul Mujnibeen	202223104030

1. Introduction

Meghdoot Resort currently relies on manual processes for room bookings, billing, and guest services — leading to errors and poor efficiency. The MRMS is a web-based system to automate and digitize all core resort operations for Admin, Receptionist, and Guest users.

2. Objectives

- Automate room booking and availability checking
- Manage guest information with role-based access
- Implement advance payment via SSLCommerz (Sandbox)
- Enable digital food and room service requests
- Auto-generate billing and invoices on check-out
- Provide admin dashboard with reports and analytics

3. Scope

Module	Description
Room Management	Add/edit/delete rooms, pricing, status
Booking System	Online booking, availability check
Customer Mgmt.	Guest registration, booking history
Payment System	SSLCommerz advance payment
Food & Room Service	Digital orders, service requests
Billing & Invoice	Auto-generated invoices on check-out
Dashboard	Reports, occupancy, revenue chart

4. User Roles

Role	Responsibilities
Admin	Rooms, staff, reports, income overview
Receptionist	Bookings, check-in/out, invoices
Guest	Book online, pay advance, request services

5. Tools & Technologies

Layer	Technology
Frontend	HTML5, CSS3, Bootstrap 5
Backend	PHP 8.x (MVC Pattern)
Database	MySQL 8.x
Server	XAMPP (Apache)
Payment	SSLCommerz (Sandbox)
Version Ctrl	Git + GitHub

6. Methodology (SDLC)

- Requirement Analysis
- System Design (DFD, UML, ER, BPMN)
- Implementation (PHP + MySQL)
- Testing (Unit, Integration, UAT)
- Deployment (XAMPP)

7. Timeline

The project is planned for completion within 5 weeks, covering all SDLC phases from requirement analysis through final deployment and documentation.

8. Expected Outcome

- Fully functional web-based resort management system
- Secure role-based access for all user types
- Integrated online booking and SSLCommerz payment
- Automated billing, invoicing, and admin dashboard
